

Regulatory Definitions of Large CAFOs, Medium CAFO and Small CAFOs

A Large CAFO (confined animal feedlot operation) confines at least the number of animals described in the table below. A medium CAFO falls within the size range in the table below and either ...

- has a manmade ditch or pipe that carries manure or wastewater to surface water; or
- the animals come into contact with surface water that passes through the area where they're confined.

If an operation is found to be a significant contributor of pollutants, the permitting authority may designate a medium-sized facility as a CAFO.

A small CAFO confines fewer than the number of animals listed in the table and has been designated as a CAFO by the permitting authority as a significant contributor of pollutants.
